Installation Guide

Agent Download

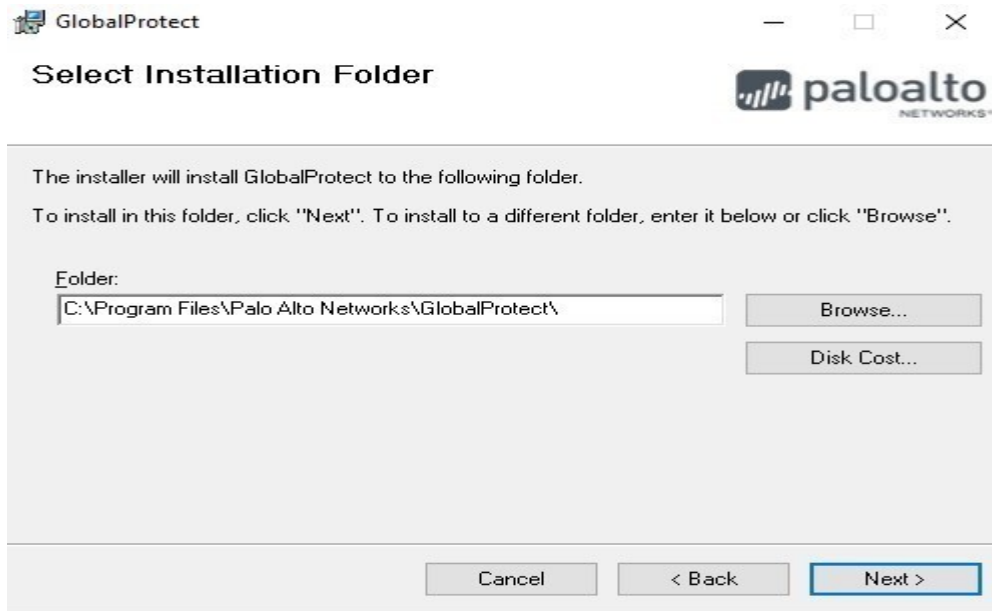

Via web browser access <http://www.salud.gov.pr/Pages/vpnclientdownload.aspx> to download the Global Protect agent that matches your computer architecture

Global Agent Installation

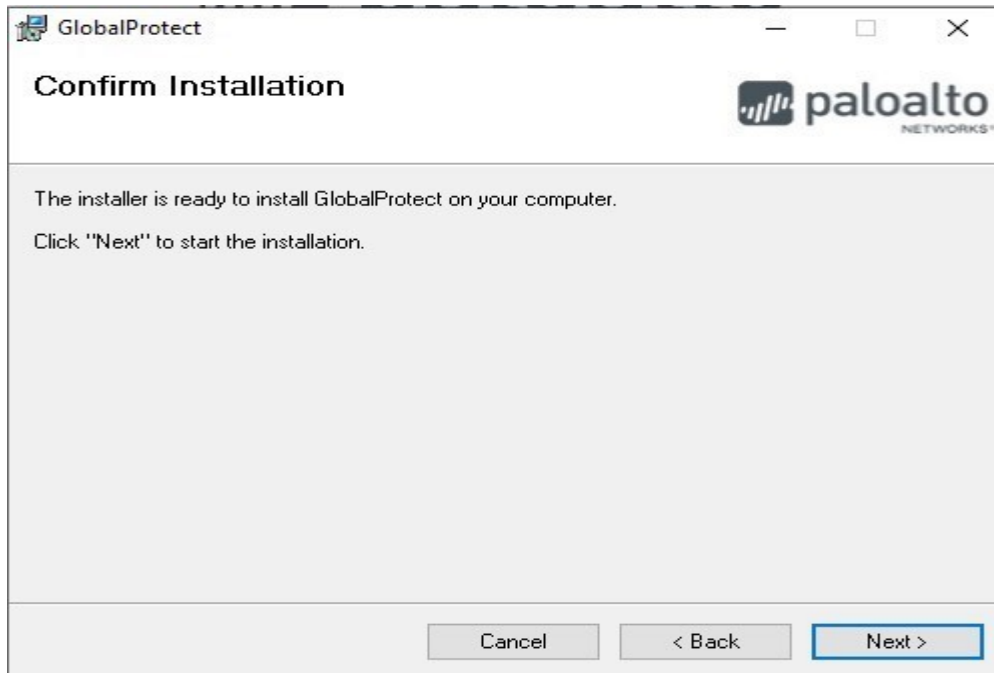

Run the downloaded file and click [Next](#)

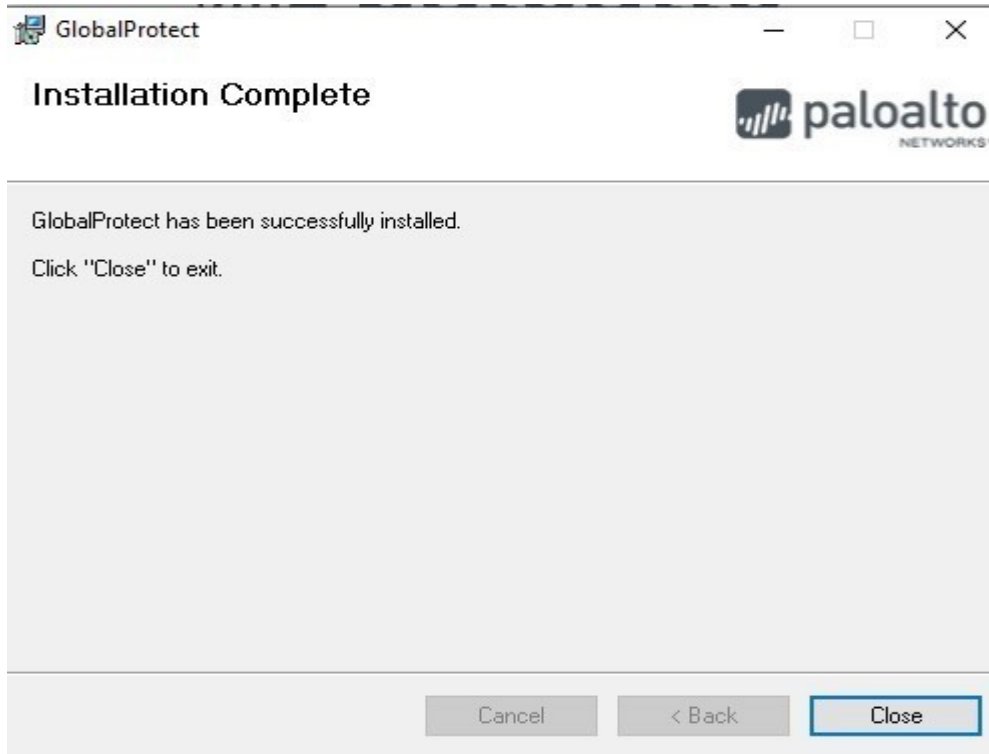

Use default path installation and click [Next](#)

Click [Next](#) to begin the installation

Click [Close](#) to exit

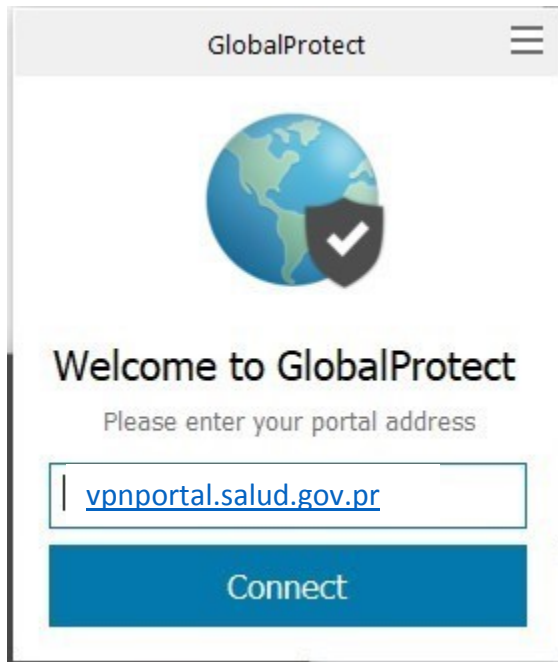

Configure VPN

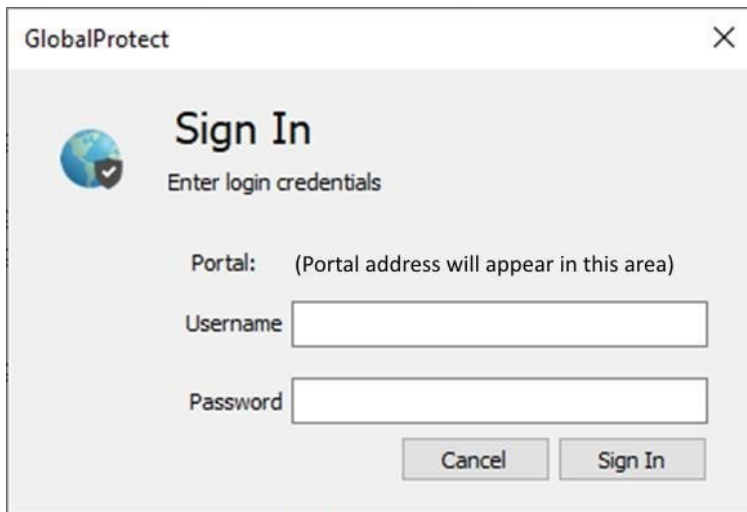

Click the grayed-out world icon on the taskbar

When the Global Protect window appears, type the portal address, vpnportal.salud.gov.pr, and click **Connect**

After the portal address has been entered, the Sign In window appears. Type your domain Username and Password. (Account used to login to corporate computers.)

When the Connected window is shown, the authentication process has been successful. You're ready to go.
